DETAILED ACTION

A paper for an RCE was filed in the instant case. As per procedure the amendment after Final filed 10/31/03 has been entered. Applicant requested in the RCE paper of 11/25/03 that the arguments of the appeal brief be considered. Since there is no appeal brief in the case the arguments of the amendment of 10/31/03 have been considered herein. An action on the merits follows.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 33 is rejected under 35 U.S.C. 102(b) as being anticipated by Andis ,616. Fig 5 appears to show the claimed comb element. Note that the rear of the plate is strengthened.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 34 is rejected under 35 U.S.C. 103(a) as being unpatentable over Andis, 616. The rational from the Office action of 7/31/03 is incorporated herein by reference.

Claim 36 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Applicant has attempted to further limit the comb element by inserting "receive" for function of the notch. It appears that the notch of Andis does receive the cutting head.

Applicant also argues that the method his method is not taught by Andis. It is noted that applicant does not claim a method but only a function which is met.
